- Google Analytics, SEO Techniques
- Web Applications, Web Security, Improving Websites, Version Management, Website Maintenance
- Integration with Google, Line, Telegram account.

ADDITIONAL INFORMATION

In the second semester of my final year, I did an internship at <https://beedatamyanmar.com/>. I learned about concepts for the Python and Django framework. I did a project called Food Dash that is just like an online food ordering system with Django framework. For now I can try to study the Python language. After three months of internship, I joined the <https://metateammyanmar.com/> as a Full Stack OJT and did a School Management System with (HTML, CSS, PHP, LARAVEL). In summary, I am experienced in working with both small and large teams across multiple projects and companies. Ready to apply knowledge and skills to any challenge.
